### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Sidney Williams on February 15, 2006.

The application has been amended as follows:

In all claims 2, 3, 4, 5, 6, 7, 9, 13, 17, 22, 24, 26, 36 change the dependency from claim 68 to claim 71.

The following is an examiner's statement of reasons for allowance: the prior art does not teach compositions of rapidly precipitating drug which is a salt form of a poorly soluble free base that is prone to super saturation when introduced in water or simulated fluid at body temperature, and more than 90% of it precipitates out within 60 min after coming to contact with said water or simulated physiological fluid, and the combination of said drug form with specific amounts of polymeric binder, a super disintegrant and a lubricant by a process wherein said ingredients are mixed and compressed without heating, solvent or grinding.

Applicant has also provided declarations for unexpected improved bioavailability of the dosage forms when the claimed specific concentrations of polymeric binder and superdisintegrants are mixed with the drug in a salt form of a poorly soluble free base

by delaying precipitation of the drug from the supersaturated solution. (see Declarations filed by Martino on Jan 16, 2003 and July 11, 2003).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
